PRESENTORS: Dr. Nestor Torres (MD)

Dr. Nestor Torres (M.D.) graduated from the Colombian School of Medicine and El Bosque University in Bogota as a medical doctor and surgeon in June, 1993. For the next three years, Dr. Torres worked as a general physician for private and public health institutions in Bogota and surrounding cities, including San Juan de Dios Hospital in Zipaquirá, where he worked in the emergency room as well as in orthopedic and trauma services.

As a specialist in Health Auditing and Health Administration, Dr. Torres ran a public medical centre in a small town for five years, where he developed and implemented public health policies in conjunction with the municipal government and according to provincial and national health regulations. He then became an administrative counselor and occupational health advisor for private institutions and factories. The beauty and harmony of the human body motivated Dr. Torres to discover another perspective of his medical vocation and, in 1999, after being trained by Brazilian and Colombian plastic surgeons, he began offering his services as a cosmetic doctor, performing non-invasive procedures. By combining different procedures such as Mesotherapy, botox, dermal fillers, liposculpting, laser treatments and the newest techniques for body contouring and skin rejuvenation, Dr. Torres has been able to help hundreds of people, in Toronto Canada where he now lives.

Dr. Michael Rahman (BSc, ND)

Dr. Michael Rahman is a Naturopathic Doctor practicing for 12 years with clinics in Toronto and Durham. After completing his Bachelor of Science with an emphasis on biology at McMaster University in 1993, he furthered his studies at the Canadian College of Naturopathic Medicine in Toronto, completing the four year doctorate program.

Dr. Rahman's practice focuses on biological medicine and its treatment of chronic diseases, from fibromyalgia to cancer, and healthy age management. His practice interest also includes naturopathic cosmetic care, blending naturopathic medicine with cosmetic approaches and technology to enhance health and beauty. He lectures and instructs naturopathic doctors from across Canada and the United States on naturopathic care, natural non-invasive cosmetic care, and advanced homotoxicological approaches to disease.
